MARIANN ALBER

As a **UX Designer**, I'm passionate about using design thinking to create user-centric products and I thrive in creative problem-solving environments. The best parts of UX for me are research, analysis, and prototyping.

- Problem-solving
- Organization and time management
- Pixel perfect

TECHNICAL SKILLS

- Figma
- Balsamiq
- Adobe Xd Lr CC
- CSS & HTML
- Protopie
- Usability Testing Tools

WORK EXPERIENCE

USER EXPERIENCE DESIGNER

Merlin | Software for Crisis *Feb 2023 - Present*

Currently engaged in the development of a design system for Merlin Crisis, with the aim of elevating and optimizing the overall user experience. This also includes redesigning the whole interface - prototyping, analysis, user flows, usability testing, and problem-solving.

UX DESIGNER

Tallinn Central Library *Jan 2024 - Jun 2024*

For my graduation, I led a user experience research project at Tallinn Central Library, focusing on improving website and app usability. Worked on simplifying content, enhancing user satisfaction, and ensuring WCAG-compliant accessibility to create a more user-friendly experience.

SERVICE DESIGNER

Nederlandse Spoorwegen *Feb 2023 - Jun 2023*

During the 'Shared Spaces' course, I worked as a service designer for NS, tasked with enhancing bike parking at smaller train stations in the Netherlands. My team and I created an innovative concept that eliminates bulky lockers, enhances the experience, and integrates storytelling and nature elements.

UX/UI DESIGN INTERN

Orbital Eye B.V. *Aug 2022 - Feb 2023*

I enhanced the CoSMiC-EYE app's usability for satellite data analysis. I refined its design, and created wireframes, and high-fidelity designs with Figma and Protopie. Collaborating with the development team and conducting user testing, I ensured an engaging and user-friendly experience.

UX RESEARCHER & DESIGNER

Merlin | Software for Crisis *Mar 2022 - Jun 2022*

During the 'Research & Design' course, I independently enhanced the CrisisSuite application. My focus was on improving the user experience during crisis warm phases. I developed a high-fidelity Logtool feature prototype, aiming to streamline data entry and improve information accessibility. This project sharpened my skills in user-centered design, rapid prototyping, and usability testing.
